Resilient infrastructure post-disaster planning

"I am working on a project , 'Build Back Better'. This is basically about planning resilient infrastructure post disaster. Suggest me some research papers that talk about this." *Generated by LeapSpace*

These papers are the strongest matches for a **Build Back Better** project on **resilient post-disaster infrastructure**, especially if you want work on land-use planning, housing, governance, and recovery frameworks. [1] [2] [3] [4]

Best starting papers

Paper	Why it fits your topic
Build back better: Implementation in Victorian bushfire reconstruction (2014)	A direct BBB case study showing how hazard-based zoning, structural improvements, stakeholder consultation, and recovery support were used in post-disaster reconstruction. [1]
Build Back Better principles for post-disaster structural improvements (2013)	A review that turns BBB into practical principles for rebuilding, using Sri Lanka and Victorian bushfires as case studies. It is especially useful for infrastructure and building standards. [2]
'Build back better' principles for land-use planning (2013)	Focuses on post-disaster land-use planning, risk-zone mapping, avoiding high-risk land, and combining planning with building regulation. [3]
Build back better: A framework for sustainable recovery assessment (2022)	Useful if you need a more analytical or evaluation-based framework for recovery, including social governance, preparedness, and learning. [5]
Build back better with people centered housing recovery (2018)	Argues that BBB is too narrow unless it includes participation, housing design, and policies that reflect people's needs. [6]
Evaluating socio-economic recovery as part of building back better in Kaikoura, New Zealand (2021)	Good for showing how BBB can be assessed in practice using psychosocial and economic recovery indicators. [7]
Selecting an institutional mechanism for Building Back Better: Lessons from Victorian bushfires recovery (2016)	Strong if you want the governance side of recovery, especially institutional design, coordination, funding, and decision-making. [8]
Supporting post-disaster social recovery to build back better (2015)	Focuses on community support, participation, transparency, and psychological recovery as part of BBB. [9]

Other highly relevant papers by theme

Infrastructure, planning, and safer reconstruction

- **Post disaster needs assessment for resilient recovery using space applications and innovative technologies** (2018): emphasizes stronger engineering design, safer resettlement, and faster recovery processes. [10]
- **Strengthening resilience in reconstruction after extreme events – Insights from flood affected communities in Germany** (2023): useful for land management, planning, infrastructure, and funding schemes that support resilient reconstruction. [11]
- **Jurisdictional decision-making about building codes for resiliency and sustainability post-fire** (2023): helpful for understanding how building code decisions shape post-disaster resilience. [12]

Housing, livelihoods, and community-centered recovery

- **Reframing “building back better” for post-disaster housing design: a community perspective** (2016): shows that BBB can fail in practice when it ignores cultural and communal needs. [13]
- **Reliability of Build Back Better at enhancing resilience of communities** (2019): compares reconstruction cases and highlights freedom of choice and continued capacity-building as key to long-term resilience. [14]
- **From relief shelters to self-organized communities: Building disaster resilience in coastal Bangladesh** (2025): supports self-help reconstruction with local materials and technical guidance. [15]
- **Rebuilding relocated tribal communities better via culture** (2020): shows how culture and livelihood can strengthen social resilience after relocation. [16]

Governance, policy, and critique of BBB

- **'Build back better' approach to disaster recovery: Research trends since 2006** (2019): a review that is useful for mapping the field and identifying major BBB themes. [4]
- **Formalizing the concept of “Build Back Better”** (2018): good for understanding how BBB was positioned within the Sendai Framework. [17]
- **'Building back better' is neoliberal post-disaster reconstruction** (2022): a critical paper if you want a more political or equity-focused angle on BBB. [18]
- **Why Don’t We “Build Back Better”? The Complexities of Re-constituting Urban Form** (2022): useful for understanding why BBB often falls short in real cities. [19]

What to read first

If you only have time for 5, start with these:

1. **Build Back Better principles for post-disaster structural improvements** [2]

2. **'Build back better' principles for land-use planning** [3]
3. **Build back better: Implementation in Victorian bushfire reconstruction** [1]
4. **Selecting an institutional mechanism for Building Back Better** [8]
5. **Build back better with people centered housing recovery** [6]

Bottom line: the BBB literature is not just about rebuilding stronger structures; the most useful papers for your project treat resilient reconstruction as a mix of **land-use planning, safer building standards, governance, community participation, and social recovery**. [1] [2] [3] [6] [9]

Confidence level: High — the retrieved papers directly address BBB, post-disaster reconstruction, and resilience across multiple infrastructure and governance dimensions.
